Summer and Fall Seeding and Top-Dressing.

Many farmers are finding it to their
advantage to seed down during the sum-
mer and fall, claiming that by so doing
they are apt to get a much better
"catch" than they do when they follow
the usual practice and seed down in the
spring.

The same is true regarding top-dress-
ing grass land. Some of the most pro-
gressive farmers put on top-dressing im-
mediately after haying, with perhaps a
small application of nitrate of soda
the following spring.

If you will send your name and P. O.
address to Carroll S. Page, Hyde Park,
Vt., he will send you free, postpaid, sev-
eral formulas for mixing fertilizers es-
pecially adapted to top-dressing and fall
seeding, together with prices of ingredi-
ents, full directions for mixing, etc.

These formulas have been approved by
the Vermont Experiment Station and
will be found thoroughly reliable.

FOR SALE

A gasoline engine in good condition.
Also polishing machines, all sorts of
polishing tools, derrick, power capstan
and hoisting machine. These articles
will be sold at a very reasonable price,
separately, or as one lot.

COAL PRODUCED IN VIRGINIA.

Geological Survey's Report on 1908 Out-look.

Notwithstanding the important develop-
ments in the Black Mountain district
of Lee county, Va., which resulted in an
increased production of coal in that coun-
ty in 1908, the total production of coal
in Virginia, according to E. W. Parker
of the United States geological survey,
whose report on the coal industry of the
United States is now in press as an ad-
vance chapter from "Mineral resources of
the United States, calendar year 1908,"
decreased from 4,710,593 short tons, val-
ued at \$4,897,552, in 1907, to 4,209,442
short tons, valued at \$3,508,924, in 1908,
a decrease of 0.89 per cent. in quantity
and of 19.54 per cent. in value. Wise
county, which is now the most important
coal producing county in the state, showed
a decrease of 889,972 short tons. Practi-
cally all of the decrease in the 1908
production was in the quantity of coal
made into coke.

Employees and Machines.

The number of employees in the coal
mines of Virginia decreased from 9,670
in 1907 to 9,208 in 1908 and the average
number of days worked decreased from
241 to 200, but the average daily produc-
tion per man increased from 2.53 to 3.44
tons. A part of the apparent increased
daily production per man, however, was
attributable to the fact that a large
number of men were employed in the de-
velopment work during 1907, which natu-
rally reduced the efficiency record for
that year. The larger number of the
mine workers in Virginia are unorgan-
ized and most of the coal-mining opera-
tions are conducted on the basis of the
ten-hour day. There were no strikes
nor lockouts during 1908, the fifth year
in success in which this condition ex-
isted.

The Number of Mining Machines in Use

in the coal mines of Virginia has in-
creased from 37 in 1906 to 77 in 1907
and 83 in 1908 and there has been a
corresponding increase in the tonnage
won by machines. The machine-mined
product in 1906 amounted to 434,343
short tons; in 1907 to 1,635,823 tons, or
34.32 per cent. of the total output. Dur-
ing the year 30,872 tons of coal was
washed, yielding 29,748 tons of cleaned
coal and 1,127 tons of refuse.

Virginia the Oldest Coal Producer.

The first bituminous coal mined in
the United States was taken from what
is usually termed the Richmond basin,
a small area in the southeastern portion
of the state, near the city of Richmond.
This basin is situated on the eastern
margin of the Piedmont plateau, 13
miles above tide water, on James river.
It lies in Gloucester, Henric, Powhatan,
and Chesterfield counties. The coal beds
are much distorted, and the coal is of
rather low grade when compared with
that from other districts with which it
has to come into competition. The oc-
currence of coal was known in the Rich-
mond basin as early as 1709, when the
ships were made in some of the
Northern states. In 1822, according to
R. C. Taylor, the production amounted
to 48,214 long tons (54,000 short tons).
At present what little coal is produced
in this field is for local consumption only.

Effect of Railways.

With the completion of the Norfolk
and Western railway, in 1882, the coal
production in the Richmond basin, the
state, which belongs to the Appalachian
system, were opened. A portion of the
famous Pocahontas district is included
within the Richmond basin, and the con-
struction of the Clinch Valley branch of
the Norfolk and Western railway in 1892
opened valuable coal lands in Wise coun-
ty, which has since become the most
important producing district in the state.
The development of the Black Mountain
field, in Lee county, after the completion
of railroad connections from Pennington
gap to Appalachia, was begun in 1905
and a small production was reported in
1906. In 1907 the output of this county
amounted to nearly 200,000 tons, and in
1908 to more than 400,000 tons. Fur-
ther development of this district is ex-
pected.

Amount of Coal Taken Out.

According to estimates by M. R.
Campbell, of the United States geologi-
cal survey, the areas containing valu-
able coals in the southwestern part of
the state cover about 1,550 square miles,
and the original contents amounted to
21,000,000,000 short tons. The Brushy
mountain field, in Montgomery county,
is estimated at 200 square miles in area,
with 900,000,000 tons. The Richmond
basin is estimated at over 150 square
miles, with 600,000,000 short tons. The
total coal area is, therefore, 1,900 square
miles, and the original contents were
approximately 22,500,000,000 short tons.
From this stock there has been mined,
to the close of 1908, 61,488,194 short
tons, equivalent to an exhaustion of ap-
proximately 92,000,000 short tons, or 0.4
per cent. of the original supply.

RATE WAR IN THE WEST.

Bill Lines to Cut Time on Trains From
Chicago to Seattle Ten Hours.

Chicago, Sept. 2.—The railroad run-
ning time from Chicago to Seattle will
be reduced to sixty-two hours—ten
hours below the present schedule—
the first move in a war declared upon
another Western and Northwestern
road by James J. Hill of the Great
Northern, according to a story the
Record-Herald prints today. Passen-
ger, mail and express business will be
affected. One result will be the finest
through mail and express train ever run
between Chicago, the Middle West and
Puget Sound territory. With this in
view, the Burlington, Great Western and
Northern Pacific have made a proposi-
tion to the post office department to
put a new fast mail train in service be-
tween Chicago and Seattle to make the
long run in sixty-two hours.

TO MAKE SUSPENDERS.

The Globe Suspenders company of Bur-
lington has filed articles of incorporation
with the Vermont secretary of state,
the capital stock being \$3,000 and the
incorporators being George P. Martin,
Stanley Tuttle and Charles J. Russell,
all of Burlington.

Alleged Robber Arrested.

Utica, N. Y., Sept. 2.—Detective
Frank L. Murray of Waterbury, Conn.,
sought and arrested at Norwich last
night one Joseph Hawley, who is charged
with highway robbery. It is alleged
that Hawley held up and robbed Post-
master James P. Catlin of Northfield,
Conn., on August 30. Hawley is held
at Norwich for extradition.

GO WITH A RUSH.

The demand for that wonderful stom-
ach, liver and kidney cure, Dr. King's
New Life Pills, is astounding. The Red
Cross Pharmacy say they never saw the
like. It's because they never fail to cure
sour stomach, constipation, indigestion,
biliousness, jaundice, sick headache,
chills and malaria. Only 25c.

SOLD BY

S. D. ALLEN, Barre, Vt.

ABOUT THE STATE

The Odd Fellows of Rutland are talk-
ing of building an Odd Fellows temple
in that city. The lodge now has a mem-
bership of about 800.

Prof. L. J. Eggleston of Rutland has
sold his share of the Vermont business
college at Burlington to N. D. Blake of
Worcester, Mass., who now owns the en-
tire school.

A Ford runabout, driven by John Col-
well, caught in a rut near Pittstown
Tuesday afternoon and turned
turtle. The occupants, Mr. Colwell and
George Worthington, Jr., of Bennington
Corners, were not injured except for a
few minor bruises. The machine was
pretty well demolished.

Five Jew peddlers arrived in Hyde
Park Friday put up at the hotel there
and started out to sell their goods Mon-
day morning. They had gone but a
short distance when Sheriff Stevens in-
terviewed them and informed them that
they must have a license to peddle in
Vermont. After some discussion they
packed their grips and left the town.

Joseph Lizot of St. Johnsbury had an
exciting experience last week in the
woods of Victory. He went out after
blueberries in company with John Du-
mas. Mr. Lizot got separated from Mr.
Dumas and in his wanderings ran into
two grown bears and two cubs. Mr.
Lizot succeeded in escaping them and
reached home before dark.

Johnson village was visited by a small
eyecore recently that did a good deal
of damage. A number of trees were
knocked up by the roots and a number of
roofs were taken off barns in that vicinity.
The electric light and telephone
wires were swept away and Johnson was
in darkness for some time. W. H.
Stearns sustained the greatest loss, his
property being damaged to the extent of
\$200.

The fishing at Lake Bomoseen is below
par this year. No special cause can be
assigned for the refusal of the fish to
bite, but the fact remains that the
strings taken from the lake have not
been up to the average of the last few
seasons. Charles E. Saunders of Rut-
land, who is an old timer at the lake,
says that not in a good many years has
he had such poor success fishing as this
year.

MAYOR BURKE ON ANARCHISM.

Said He Wouldn't Allow Lecture in the
Burlington City Hall.

Burlington, Sept. 3.—"Emma Goldman
will not be allowed to speak in City
hall to-morrow evening or at any other
time," said Mayor Burke yesterday af-
ternoon.

"Neither will she be allowed to speak
on the street," continued the mayor.
"Emma Goldman is a disciple of anarchy,
and as such, an address by her would be
a serious matter to the city. I believe
to be the right thing to allow in our
city hall."

"Will she be allowed to speak in any
other hall?" was the question put to
the mayor.

"Well, if she doesn't create a distur-
bance, I suppose she can speak, but she
will not get a permit to make a harangue
on the street or in the city hall."

"But the hall has already been rented
and the money paid for it," it was sug-
gested.

"The money will be returned to Emma
Goldman, but she can't have the hall."

"Have you the right, as mayor, to
keep her out?"

"I will assume the right," rejoined
the mayor.

Dr. Ben Reimann of the New York free
speech committee, who is acting as the
agent for Emma Goldman, was the man
who hired the hall.

"I might as well make a fight for free
speech right here in Burlington as any-
where else," said the doctor, "and am go-
ing to fight for my rights." The doctor
hinted that he might get out an injunc-
tion restraining the mayor from inter-
fering with his plan.

RAVAGES BY DEER.

Brattleboro Selectmen Adjust Claims
Made by Farmers.

Brattleboro, Sept. 3.—The Brattleboro
selectmen visited Ames Hall recently
and adjusted the claims presented by H.
K. Hamilton, Fred B. Barrows and F. D.
E. Stowe on the damage done to their
apple orchards by deer.

Hamilton was allowed \$3.50 for garden
produce destroyed and \$5 for damage to
the apple trees. Mr. Barrows was
awarded \$10.25 for damage to trees and
Mr. Stowe's claim came to \$38. In the
orchard of the latter 122 fruit trees
were damaged out of 180 composing the
orchard.

TO MAKE SUSPENDERS.

The Globe Suspenders company of Bur-
lington has filed articles of incorporation
with the Vermont secretary of state,
the capital stock being \$3,000 and the
incorporators being George P. Martin,
Stanley Tuttle and Charles J. Russell,
all of Burlington.

COAL PRODUCED IN VIRGINIA.

Geological Survey's Report on 1908 Out-look.

Notwithstanding the important develop-
ments in the Black Mountain district
of Lee county, Va., which resulted in an
increased production of coal in that coun-
ty in 1908, the total production of coal
in Virginia, according to E. W. Parker
of the United States geological survey,
whose report on the coal industry of the
United States is now in press as an ad-
vance chapter from "Mineral resources of
the United States, calendar year 1908,"
decreased from 4,710,593 short tons, val-
ued at \$4,897,552, in 1907, to 4,209,442
short tons, valued at \$3,508,924, in 1908,
a decrease of 0.89 per cent. in quantity
and of 19.54 per cent. in value. Wise
county, which is now the most important
coal producing county in the state, showed
a decrease of 889,972 short tons. Practi-
cally all of the decrease in the 1908
production was in the quantity of coal
made into coke.

Employees and Machines.

The number of employees in the coal
mines of Virginia decreased from 9,670
in 1907 to 9,208 in 1908 and the average
number of days worked decreased from
241 to 200, but the average daily produc-
tion per man increased from 2.53 to 3.44
tons. A part of the apparent increased
daily production per man, however, was
attributable to the fact that a large
number of men were employed in the de-
velopment work during 1907, which natu-
rally reduced the efficiency record for
that year. The larger number of the
mine workers in Virginia are unorgan-
ized and most of the coal-mining opera-
tions are conducted on the basis of the
ten-hour day. There were no strikes
nor lockouts during 1908, the fifth year
in success in which this condition ex-
isted.

The Number of Mining Machines in Use

in the coal mines of Virginia has in-
creased from 37 in 1906 to 77 in 1907
and 83 in 1908 and there has been a
corresponding increase in the tonnage
won by machines. The machine-mined
product in 1906 amounted to 434,343
short tons; in 1907 to 1,635,823 tons, or
34.32 per cent. of the total output. Dur-
ing the year 30,872 tons of coal was
washed, yielding 29,748 tons of cleaned
coal and 1,127 tons of refuse.

Virginia the Oldest Coal Producer.

The first bituminous coal mined in
the United States was taken from what
is usually termed the Richmond basin,
a small area in the southeastern portion
of the state, near the city of Richmond.
This basin is situated on the eastern
margin of the Piedmont plateau, 13
miles above tide water, on James river.
It lies in Gloucester, Henric, Powhatan,
and Chesterfield counties. The coal beds
are much distorted, and the coal is of
rather low grade when compared with
that from other districts with which it
has to come into competition. The oc-
currence of coal was known in the Rich-
mond basin as early as 1709, when the
ships were made in some of the
Northern states. In 1822, according to
R. C. Taylor, the production amounted
to 48,214 long tons (54,000 short tons).
At present what little coal is produced
in this field is for local consumption only.

Effect of Railways.

With the completion of the Norfolk
and Western railway, in 1882, the coal
production in the Richmond basin, the
state, which belongs to the Appalachian
system, were opened. A portion of the
famous Pocahontas district is included
within the Richmond basin, and the con-
struction of the Clinch Valley branch of
the Norfolk and Western railway in 1892
opened valuable coal lands in Wise coun-
ty, which has since become the most
important producing district in the state.
The development of the Black Mountain
field, in Lee county, after the completion
of railroad connections from Pennington
gap to Appalachia, was begun in 1905
and a small production was reported in
1906. In 1907 the output of this county
amounted to nearly 200,000 tons, and in
1908 to more than 400,000 tons. Fur-
ther development of this district is ex-
pected.

Amount of Coal Taken Out.

According to estimates by M. R.
Campbell, of the United States geologi-
cal survey, the areas containing valu-
able coals in the southwestern part of
the state cover about 1,550 square miles,
and the original contents amounted to
21,000,000,000 short tons. The Brushy
mountain field, in Montgomery county,
is estimated at 200 square miles in area,
with 900,000,000 tons. The Richmond
basin is estimated at over 150 square
miles, with 600,000,000 short tons. The
total coal area is, therefore, 1,900 square
miles, and the original contents were
approximately 22,500,000,000 short tons.
From this stock there has been mined,
to the close of 1908, 61,488,194 short
tons, equivalent to an exhaustion of ap-
proximately 92,000,000 short tons, or 0.4
per cent. of the original supply.

RATE WAR IN THE WEST.

Bill Lines to Cut Time on Trains From
Chicago to Seattle Ten Hours.

Chicago, Sept. 2.—The railroad run-
ning time from Chicago to Seattle will
